

Name: _____

Date: _____

HW # 17a: Algebra 1 - Standard 10 - Intercepts of Graphs

5 points

Solve each equation by graphing. Check your solution.

Show work needed to justify your answer.

14. $2x - 3 = 3$

15. $-4x + 2 = -4x + 1$

16. $4 = \frac{1}{2}x + 5$

18. $3x - 5 = 3x - 3$

20. **INVITATIONS** Moesha and Keyon are mailing invitations for their wedding. They have \$50 to spend and each invitation costs \$1.25 to mail. The function $m = 50 - 1.25w$ represents the amount of money m Moesha and Keyon have left after mailing w wedding invitations. Find the zero of the function. Describe what this value means in the context of this situation.

21. **GIFT BAGS** Juanita is tying ribbon on gift bags. She has 24 feet of ribbon and each gift bag uses 0.75 foot of ribbon. The function $r = 24 - 0.75g$ represents the amount of ribbon r Juanita has left after tying ribbon on g gift bags. Find the zero of the function. Describe what this value means in the context of this situation.
